Summary

Full Stack Web Developer with a strong foundation in programming and problem-solving, currently pursuing a degree in Electronics and Communication Engineering. Experienced in building responsive and scalable web applications using modern technologies like React, Node.js, and JavaScript. Combines core engineering principles with software development skills to create efficient, real-world solutions. Passionate about continuous learning and developing impactful digital products.

Skills

Programming Languages: C language, DSA in C++, Python.

Development Skills: HTML, CSS, JavaScript, React, Node, Express, Mongo DB.

Soft Skills: Time Management, Teamwork, Communication, Problem Solving, Work in Pressure.

Projects

Personal Voice Assistant

Python

- A smart voice assistant capable of: Sending WhatsApp messages directly through WhatsApp Web, Playing any song instantly from YouTube, Opening social media platforms like Facebook, LinkedIn more with simple voice commands.
- [GitHub Repository](#) || [LinkedIn Post](#)

Akash // Portfolio

HTML, CSS, JS

- Designed and developed a fully responsive **portfolio website** with interactive animations, sound, unique features and smooth transitions.
- [Live Portfolio](#) || [GitHub Repository](#)

AI-powered Interview Report Generator

MERN stack

- Built an AI-powered full-stack platform that streamlines interview preparation by converting job descriptions and resumes into structured 10-day study plans. Features include match score evaluation, skill gap detection, and generation of role-specific technical and behavioral questions.
- [LinkedIn Post](#) || [GitHub Repository](#) || [Live Web](#)

Data Visualization Dashboard

Python, Dash, Poltly, SQL

- Built a interactive sales dashboard and integrated multiple data sources, added advanced analytics (Funnel, Cohort Choropleth), and transformed static reports into actionable insights.
- [LinkedIn Post](#) || [GitHub Repository](#) || [Live Web](#)

Text Based Gaming Website

Python, Flask, UI elements

- Developed a narrative-driven, text-based adventure game using Python and Flask, featuring dynamic decision trees, visit-based branching, and multiple endings. Implemented a modern web UI with animations, audio feedback, and persistent game state via save/load functionality.
